ABOUT DTAC

An Australian company with over 15 years in design and product innovation excellence, DTAC is a specialised team of professionals that focus on producing superior quality products to meet the challenges of Australia's Tactile, Stair Tread and Edging compliance.

DTAC provides a complete service nationwide, facilitated through our trained experts and DTAC's certified tactile and edging installers. We design, manufacture and install a leading range of tactile ground surface indicators (TGSI's), stair treads and edging solutions along with anti-skate products for edge protection and handrail tactile indicators (HRTI's).

We also provide a range of services to complement our product offering including design and layout consultation, access consultancy and risk management assessments or programs.

Our industry leading attention to detail ensures that architects, builders, designers and specifiers make the right selection, for aesthetics and product quality while maintaining regulatory compliance.

Disclaimer: All technical data and recommendations although based upon our research and believed to be reliable are given in good faith but without warranty. It is understood that users will independently determine the suitability of the DTAC's website content shown herein for their purposes.

2 | ABOUT DTAC PEMKO® © DTAC Pty Ltd 2022

DTAC[®]

THE DTAC DIFFERENCE

When using DTAC products and services, you can be assured that:

- Products and solutions are designed to meet or even exceed certification and Australian and New Zealand Standards requirements
- Consultative support including layout and compliance services are provided throughout the life of the project including NCC interpretation
- DTAC manage the entire project from design and manufacturing to installation using our team of accredited professionals
- DTAC strive for excellence in design and craftsmanship but also back our products by warranty
- DTAC is part of the Raven Group of companies ensuring the highest quality products and services

HOW CAN DTAC HELP?

DTAC are a vertically integrated business that designs, installs and maintains their products to the exacting codes and standards of the applicable regulatory body. We have a team of trained personnel all of whom are experienced in the requirements of the relevant standards and codes.

WE CAN HELP:

- Interpret and apply the relevant standards and codes applicable to your project
- Design a solution to your project requirements
- Manufacture and install products on site

CONTACT US

If you have any questions in relation to the DTAC range, DTAC is ready and able to assist you in getting it right.

Email a DTAC representative at solutions@dtac.com.au or for a friendly voice you can call 1300 793 478.

SERVICES

DTAC provides complete services nationwide, facilitated through our trained experts and DTAC's certified tactile and edging installers.

Our industry leading attention to detail ensures that architects, builders, designers and specifiers make the right selection, for aesthetics and product quality while maintaining regulatory compliance.

SUPPLY & INSTALLATION

DTAC design and craft their own products and services in Australia. With a comprehensive range of tactiles and stair treads available you can be certain that DTAC have the right product and the right advice for your application.

Our range is designed to conform to the NCC and Disability Discrimination Act (DDA) requirements with extensive testing and certification available.

DTAC can supply product only as well as supply and install our own products, keeping records for each DTAC Project Management installation. DTAC installers are trained under the DTAC 18 Step Accreditation process known as 'The Art of Tactile Certification TM '

DTAC[®]

PRODUCT SELECTION & COMPLIANCE CONSULTATION

DTAC have a team of trained professionals who are experienced in the field of TGSI's and stair treads explicitly in the normative aspects of AS/NZS 1428.4.1. When you choose DTAC products, our experts are available to assist with product selection, specification as well as designing compliant layouts and installations.

By specifying DTAC products and utilising our layout and installation expertise, you can avoid costly project delays and ensure the highest level of compliance.

DTAC ACCESS CONSULTING

DTAC Access Consultants aim to provide architects and builders with practical and objective advice on the provision of access to premises (buildings) for people with disabilities. Specifically in the interpretation of AS/NZS 1428.4.1 and how this is applied to tactiles and stair tread installations.

RISK MANAGEMENT & MAINTENANCE

With the ever changing legislative environment and the legal requirement to maintain tactile and stair tread installations, DTAC can provide once off risk assessment services as well as ongoing maintenance programs.

WARNING TGSI's

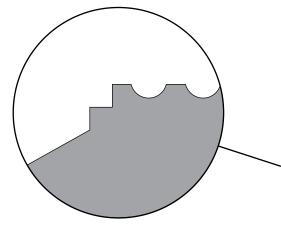

Warning TGSI's are a series of raised dots that are installed on pedestrian surfaces. They assist in the orientation of the vision impaired and give tactile warning so they may safely navigate the built environment.

Felt under foot, detected by cane, or even read as a light contrast between a surface and a hazard, TGSI's give information to the vision impaired on where they are, where they are going and where they have been.

With an extensive range of designs and colours, DTAC work closely with architects, specifiers and builders to exceed design and aesthetic expectations on every project.

- Available in a range of colours and designs to suit all applications
- Solutions for all stable surfaces and substrates
- Designed to comply with building codes and regulations
- Tested for compliance with luminance and slip resistance requirements
- Backed by 2 year warranty

DTAC's Warning TGSI's are identifiable by the unique registered "double lip" design, providing a distinct advantage when it comes to high slip resistance.

STAINLESS CLASSIC

DTAC Classic Warning Tactiles combine a high quality finish with high slip resistance properties. Manufactured in 316 marine grade stainless steel, featuring a concentric circle design on the horizontal face with a smooth outer edge.

INTEGRATED TGSI's

Integrated TGSI's are a series of raised dots affixed to a backing plate that is installed on pedestrian surfaces as a complete unit. They assist in the orientation of the vision impaired and give tactile warning so they may safely navigate the built environment.

Felt under foot, detected by cane, or even read as a light contrast between a surface and a hazard, TGSI's give information to the vision impaired on where they are, where they are going and where they have been.

With an extensive range of designs and colours, DTAC work closely with architects, specifiers and builders to exceed design and aesthetic expectations on every project.

- Available in a range of colours and designs to suit all applications
- Solutions for all stable surfaces and substrates
- Designed to comply with building codes and regulations
- Tested for compliance with luminance and slip resistance requirements
- Backed by 2 year warranty

ULTIMAT® TACTILE

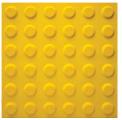

ULTIMAT® TACTILE

DTAC Ultimat® Tactiles combine a high quality finish and the flexibility of colour choice with durable high grade urethanes ensuring high slip resistance properties. Moulded in high impact UV stabilised urethane, featuring a concentric circle design on the horizontal face with a smooth outer edge.

Used in conjunction with adhesive to provide excellent adhesion eliminating the need for a butyl backing.

STAIR TREADS, THRESHOLD TRANSITIONS & EDGING **STRIPS**

DTAC's range of PEMKO® stair treads and edging has transformed the manner in which you can detail a stair edge, nosing or connection. DTAC's retrofit edging series delivers a practical and aesthetically pleasing approach to slip prevention and edge protection.

Discreet in appearance, uncompromised in their design functionality and pure material aesthetic, DTAC edging can be adapted for all architectural and joinery situations including carpet and stable finished surfaces and substrates.

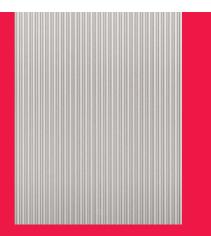

With many designs and finishes available, our range of edging and stair treads provide an NCC compliant solution with a flawless finish.

- Premium quality flat or angle aluminium profiles satin hard anodised finish
- Suitable for all stable finished surfaces and substrates
- Designed to comply with AS 1428.1
- Tested for compliance with luminance and slip resistance requirements
- Backed by 2 year warranty

PEMKO® THRESHOLD PLATES

Pemko® threshold plates are hard anodised. aluminium extrusions that are fitted to the sill under doors; they provide a clean delineation between adjacent floor surfaces.

A weather barrier in themselves, threshold plates provide an optimum sealing surface for door bottom seals. Being hard wearing, threshold plates offer an elevated sealing surface which, in the case of door bottom sweep seals, prevents contact or excessive resistance over carpeted or uneven floors.

DTAC threshold plates have been designed to withstand the day-today rigours of heavy pedestrian and wheeled traffic encountered in commercial buildings.

Where disabled access is a requirement, ensure that the threshold plate is suitable for wheeled access and that it conforms to the relevant building code or standard.

STAIR EDGING SYSTEMS FOR CARPET

DTAC's range of PEMKO® stair edging systems for carpet has transformed the manner in which you can detail a carpeted stair edge. The DTAC edging series provide a practical and aesthetically pleasing approach to slip prevention and carpet edge protection.

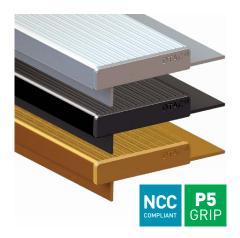

With several designs and finishes available for carpeted stairs, our range of edging and stair treads provides an NCC compliant solution with a flawless finish.

- Suitable for carpet thicknesses of 6-10mm
- Escutcheon plates available for stairs with exposed ends
- Designed to comply with AS 1428.1
- Tested for compliance with luminance and slip resistance requirements
- Backed by 2 year warranty

URBAN EDGE PROTECTORS

In today's modern landscape, seats, benches and garden beds are exposed to damage caused by skateboards, rollerblades and BMX bikes.

The damage and, in the most extreme cases, destruction of these unprotected surfaces, often render the exposed edge of a seat or bench unsafe and hazardous, costing thousands of dollars to repair or totally replace. In the case of timber seats, splinters are likely to occur. With stone and masonry cracks and chunks of material eventuate leaving the surface unsightly and very uncomfortable for the resting pedestrian.

DTAC Urban Edge Protectors assist in the deterrence and prevention of damage to exposed edges in urban environments. Without DTAC Urban Edge Protectors, damage and injury may result requiring a vigilant monthly maintenance program to repair the constant destruction including chipping paint, cracked capping, waxed/marked walls and damaged handrails.

Positioned on the side of ledges, steps, planter boxes, garden edges, seating, benches and even handrails, the DTAC range of edge protectors can be placed at regular intervals in critical locations that are likely to be prone to damage. Installing DTAC bars and buttons will enable those in these situations to reclaim their spaces and avoid vast sums of time and money that would otherwise be spent cleaning and repairing their property.

DTAC's edge protector range combines deterrence with asset protection. Their appearance is discreetly blended within their environment but pronounced enough to deter. Good building and urban design coupled with planning and appropriate installation can make DTAC Edge Protectors a design feature promoting a safe environment for all persons.

Prevention is always better than the cure. DTAC edge protectors whether incorporated at the conception of a project or retrofitted to an existing environment provide the opportunity for seamless integration through design, product selection and placement.

BUTTON ROUND

BUTTON ROUND

Manufactured in 316 marine grade stainless steel or solid brass, the DTAC round button edge protector helps to deter and prevent unwanted "grinding" damage from skateboards, rollerblades and BMX bikes.

EDGE PROTECTOR BUTTON ROUND (STAINLESS STEEL)

PRODUCT CODE: DEPO010

SUITABLE FOR SUBSTRATES

Stone, masonry, timber, vinyl, vitrified porcelain, ceramics, glass, metals

FIXING

Drill and glue or diamond core and glue

BAR THICK

Manufactured in 316 marine grade stainless steel, the DTAC thick bar edge protector helps to deter and prevent unwanted "grinding" damage from skateboards, rollerblades and BMX bikes.

EDGE PROTECTOR BAR (THICK)

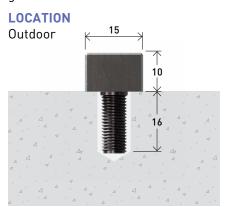

PRODUCT CODE: DEP0060

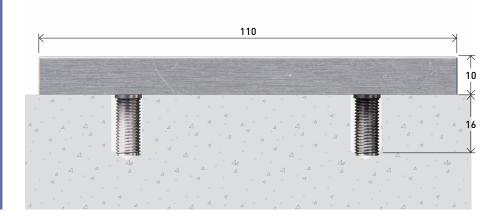

SUITABLE FOR SUBSTRATES

Stone, masonry, timber, vinyl, vitrified porcelain, ceramics, glass, metals

FIXING

Drill and glue or diamond core and glue

HANDRAIL TACTILE **INDICATORS**

DTAC Handrail Tactile Indicators (HRTI's) are used when handrails are not continuous and/or no tactile ground surface indicators are required.

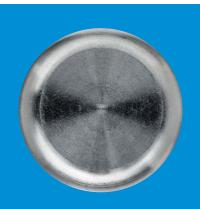

HRTI's assist the visually impaired to safely negotiate stairs by indicating where a handrail and stairway ends and also help to deter and prevent unwanted "grinding" damage from skateboards, rollerblades and BMX bikes.

Handrails themselves should be designed and installed to comply with AS 1428.1 and with the NCC Section D3.8.

STAINLESS STEEL

STAINLESS STEEL

Manufactured in 316 marine grade stainless steel, the DTAC handrail button has been designed to meet the requirements of AS/NZS 1428.4.1.

HANDRAIL BUTTON (STAINLESS STEEL)
